

OSEH Prescription Safety Glasses FAQ's

- Requests can be made by going to www.oseh.umich.edu and clicking on “safety shoes/glasses” listed under popular links on the main page.
- Requests MUST come from the supervisor or their delegate. The delegate can be anyone the supervisor wants to appoint, but requests should only come from one person in a lab.
- Our program covers permanent staff, graduate students, research fellows and faculty. We do not cover visiting scholars, volunteers, sponsored affiliates, undergrads, anyone with less than a one year appointment or Auxiliary units. There is no charge for general fund units.
 - Anyone who is not covered can still obtain glasses through our program with a short code provided at the time of the request. The cost of prescription safety glasses is \$79.95.
- You must have a current (within 2 years) prescription with you at the time you get your safety glasses. OSEH does not cover the cost of an eye exam.
- You are responsible for any co-pays at the time of purchase. A co-pay is only required if you choose to upgrade your frames or lenses. Basic glasses are covered in full.
- The “voucher request form” is a Google form. Everyone at the University of Michigan has access to Google forms, even if you don’t use Gmail. If you try to request a pair of glasses and Google tells you the form needs to be “shared” with you, log out of your email, go directly to the form and try the request again.
- If you have questions about this document or the program itself please contact:
 - Tara Welch at 734-647-1142 or taralp@umich.edu
