conversations with the world's best scientists

Douglas R Green, PhD

*Balancing Act:
Caspases and RIP kinases
in the control of development and cell death*

Tuesday, June 17, 2014

12:00 - 1:00 PM

Limited boxed lunches available at 11:30am

Research Auditorium
NCRC Building 10
2800 Plymouth Road

Doug Green is the Peter C Doherty Endowed Chair of Immunology at St Jude Children's Research Hospital. His research has focused on the process of active cell death and cell survival and extends from the role of cell death in the regulation of cancer and immune responses in the whole organism to the fundamental molecular events directing the death of the cell.
