Flavors Cafeteria Opens
The highly anticipated Opus One cafeteria, Flavors, is up and running in building 18! The first week has shown us a variety of new food options such as buttermilk pancakes, scrambled eggs, crispy bacon, full salad and sandwich bar, hot burgers and juicy ribs with a side of mashed potatoes! We are not the only ones excited about all this delicious food, so let’s hear what the NCRC Community has to say:

“My department was extremely eager to have the addition of the cafeteria; many would rather stay in then venture out in the cold. So, all in all, the “Flavors” cafeteria has been a positive move.”
- Tracy Dennis, Space Information, Analysis, and Planning

“Being a full time student with an internship, doesn’t leave much time to actually sit down and enjoy a decent meal. Having the cafeteria on-site gives me the opportunity to do so. I highly recommend the cream of broccoli soup!”
- Allen Farmer, Engineering Student

“I had lunch at Flavors this week and it was great. There are hot and cold lunch options right here in our building. The burger was made to order and it was delicious.”
- Todd J. Herron, PhD, Department of Molecular & Integrative Physiology Center for Arrhythmia Research
